ABOUT ME

I am a passionate Computer Science student driven by curiosity and creativity in the world of technology. I enjoy turning ideas into meaningful projects through coding, design, and problem-solving. With a growing knowledge of web development, programming, and system support, I'm eager to keep learning and improving every step of the way.

SKILLS

Web Design (HTML, CSS) — **85%**

Java Programming — **90%**

Networking & Troubleshooting — **45%**

Database Management (MySQL) — **75%**

Rodelyn C. Cardinas

Aspiring IT Professional

EDUCATION

Bachelor of Science in Computer Science

Major in Software Engineering

Developing a strong foundation in programming, system design, and database management. My studies focus on building innovative software solutions and exploring creative approaches to technology.

EXPERIENCE

Portfolio Website Development

January 2023 - Present

- Created a responsive and visually appealing portfolio website showcasing my projects, skills, and growth as a Computer Science student.
- Designed and implemented modern layouts using HTML, CSS, and JavaScript, ensuring user-friendly navigation and performance optimization.

IT Support Volunteer – Community Center

2022 – 2023

- Assisted in maintaining and troubleshooting computer systems and network connections within the local community center.
- Helped install and configure essential software while providing technical guidance to staff and community members.

Database Management Project

September 2021 – December 2021

- Designed and implemented a relational database using MySQL to manage records efficiently.
- Created data forms and reports for easy information access and ensured data accuracy and reliability.
